Advise de Commission in OS

DIRECTORATE-GENERAL FOR RESEARCH AND INNOVATION (RTD)

New policy initiative: The establishment of an Open Science Policy Platform

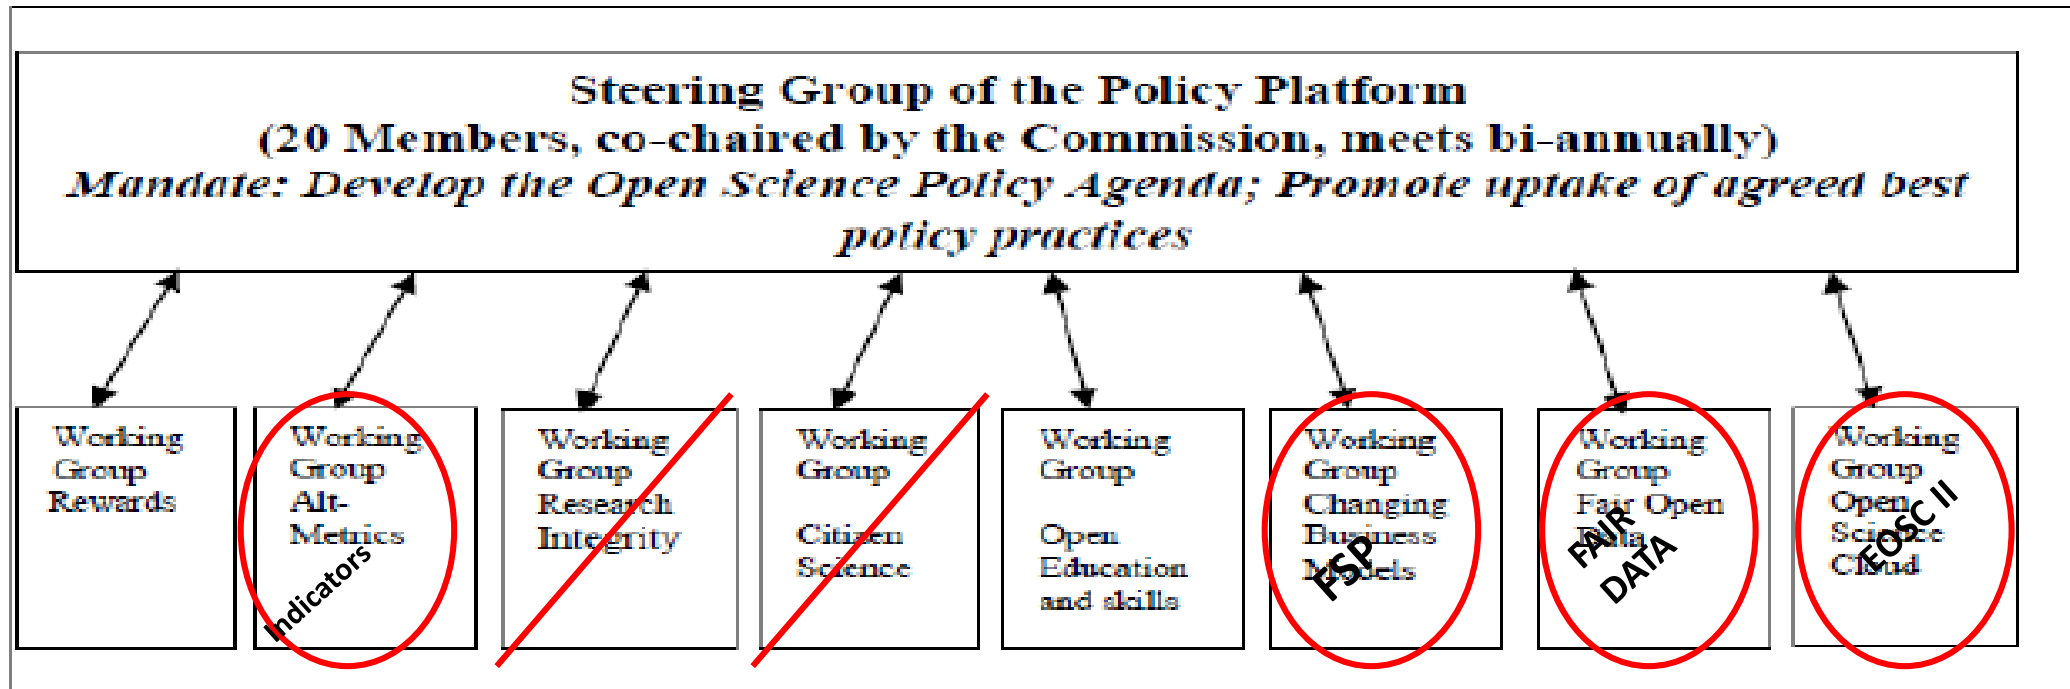

The Directorate-General for Research and Innovation (DG RTD) intends **to set-up an Open Science Policy Platform to develop open science policy through a structured discussion with the main stakeholders.**

Strengthening the dialogue with stakeholders will constitute an opportunity for developing, guiding, and monitoring Open Science. **The Policy Platform will provide advice to the Commission on open science policy in Europe as well as on the coordination of those policies with stakeholders.** The implementation of open science policy will be effectuated by the active advocacy of agreed policies by these stakeholders.

The Open Science Policy Platform will be governed by a Steering Group composed of top-leading individuals of (European) branch organisations with the required decision-power. DG RTD will seek to appoint individuals from the following stakeholder groups:

Promote uptake of agreed best policy practices (HLEG)

The working groups will engage with as many interested parties as possible and will embrace interactive online participation. The work and outcome of the discussions of the working groups will be widely shared with the research communities and interested public to give them the opportunity to contribute. All underlying discussion material, minutes and reports will be published on an interactive website of the Platform. There will therefore be room for a real exchange of views among peers and new actors.

OSPP-REC

2.2. Prioritised recommendations for the eight ambitions of Open Science

Below are a set of actionable recommendations from the OSPP to be taken as the next step towards the longer-term vision articulated by Open Science consultations and expert groups set up by the EC and other organisations in Europe and worldwide. The recommendations have been split up into the eight priorities identified from the 5 areas of the European Open Science Agenda⁶, namely:

- Rewards and Incentives
- Research Indicators and Next-Generation Metrics
- Future of Scholarly Communication
- European Open Science Cloud
- FAIR Data
- Research Integrity
- Skills and Education
- Citizen Science

The major stakeholder groups (as listed in the key below) who have the main responsibility to drive the actions stated in the recommendations have been listed alongside each one.

	Research & E-Infrastructures		Research Libraries		Universities & Research Performing Organisations
	Policy Making Organisations		Research Funding Organisations		Publishers
	Researchers		Scientific Societies & Academies		Citizen Science & Public Engagement Organisations

Institutional answers to OSPP-REC

HLEG on Indicators
HLEG on FSC

26 REC

13 REC

Challenges

Challenges = Building blocks

1. Removing barriers and **creating incentives** (alternative/next generation metrics, research integrity, TDM (Text and Data Mining)).
2. Developing **infrastructures** for Open Science (e.g. European Open Science Cloud, EOSC).
3. Embedding Open **Science in Society** (citizen science, public engagement... knowledge coalitions to address societal challenges).

Challenges

- **Cultural change** (researchers mindset)
[Darling, we need to talk!!]
- **Education (Skills)** → training ECR but also senior researchers
- **Attitude CC: Conviction & Confidence** →
Demonstrate the INFLUENCE of **Open Knowledge**
- **Strategic alignment** with internal policies

Motivators of will... (for academics)

Seduction

Implementation (PCI)

The image features a central blue banner with the text 'Implementation (PCI)'. Below the banner, a large, stylized yellow hand with a light blue cuff is pointing towards a central digital interface. The background is a collage of various UI design elements, including wireframes, text blocks, and navigation bars, all in shades of yellow, orange, and teal. The overall aesthetic is clean and modern, representing a digital design or development process.

OSPP-M2

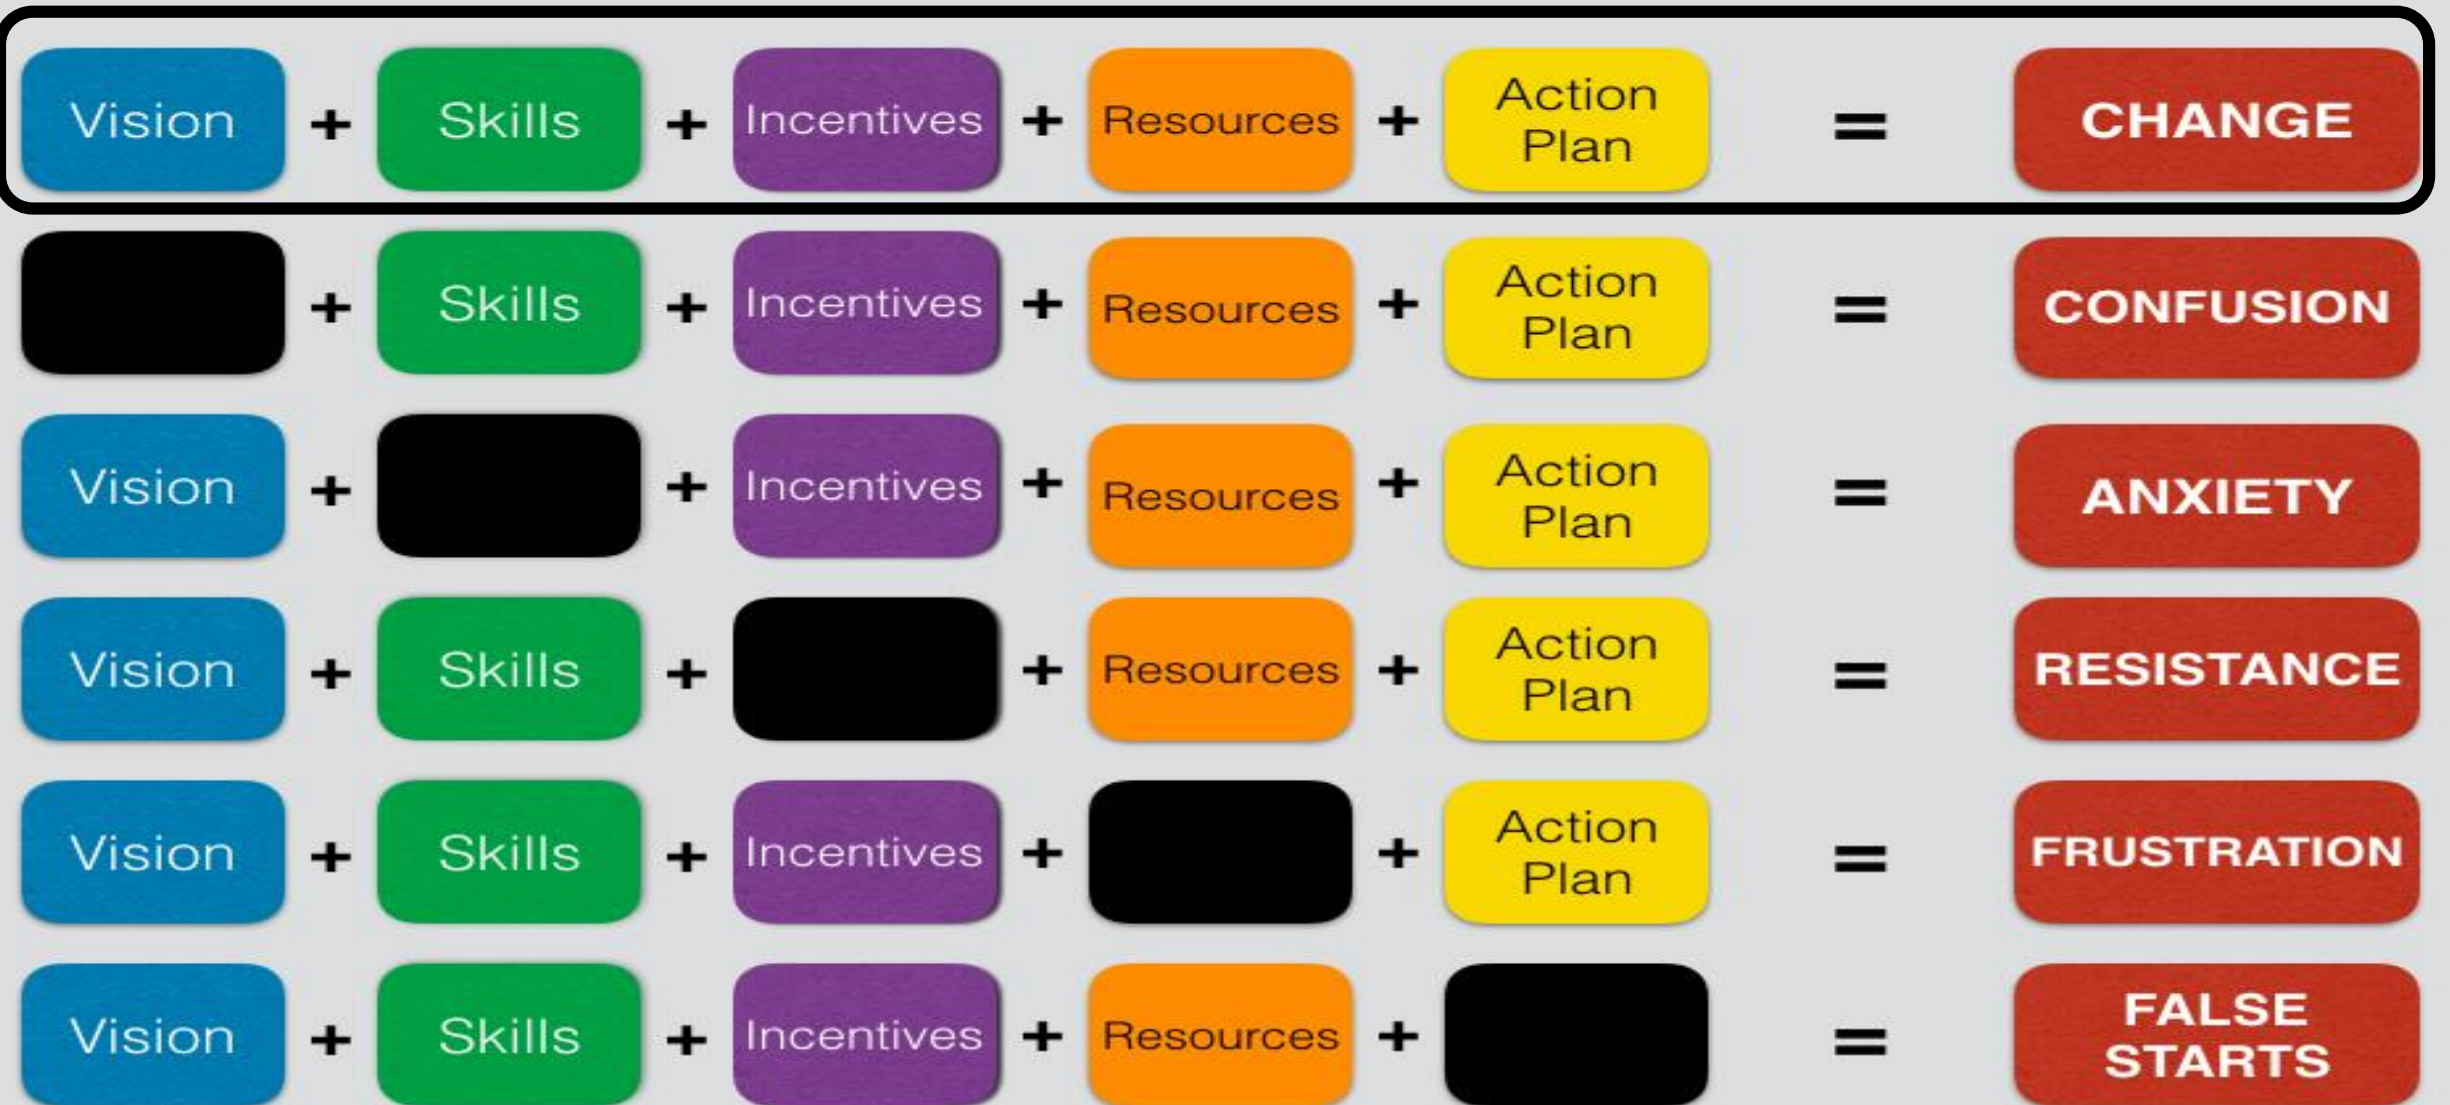

From RECs & Declarations to PCIs

EU-OSPP (M2)

- Communication and engagement (@euospp)
- Change from *Declaration mode* to the *Implementation mode*.
 - from REP&REC to PCIs
 - From #YAD to #NPCI
- Map all the projects working in Open Science (eInfras, SWAFS, etc.)
- **Align MS policies. Align OSPP-MS objectives**

Managing Complex Change

We need **PCIs** (Practical Commitments for Implementation) for Open Science

- You, at your institution, at your office, with your attributions, etc. **what can you do for Open Science?** (regarding the 8 challenges, and taking into account your condition as stakeholder...)
 - I am a researcher....
 - I am a policy maker...
 - I am a publisher...
 - I am a research infrastructure manager...
 - I am a librarian, etc.
 - I am the rector/president...

What are PCIs...

- **Commitments**
- Actual, **realistic** and **affordable**... in a level where the proponent has “jurisdiction”
- **Effect** → real **implementation**
- Answer to the question: *What **CAN** I do to... implement Open Science...*
- Open science at “action level” (**practical**)
- [**Alignment** at MS level →]

What is cOALition S?

On 4 September 2018, a group of national research funding organisations, with the support of the European Commission and the European Research Council (ERC), announced the launch of cOALition S, an initiative to make full and immediate Open Access to research publications a reality. It is built around Plan S, which consists of one target and 10 principles.

cOALition S signals the commitment to implement, by 1 January 2020, the necessary measures to fulfil its main principle:

17 ENE ADOPTING PLAN S AS AN INDIVIDUAL RESEARCHER

Posted at 18:01h in Sin categoría by 1dinamoanx • 0 Comments • 0 Likes • Share

Since Plan S was announced last September, I have been ruminating about whether it should be something for funding agencies only, or on the contrary it should involve individual researchers too, so bottom-up working together with top down. As you probably know, [Plan S](#) is an initiative

for Open Access publishing supported by cOAlition S, an international consortium of research funders. Plan S requires that, from 2020, scientific publications that result from research funded by public grants must be published in compliant Open Access journals or platforms. So far, 13 national funders, along with other organizations have joined cOAlition S, and I do hope, along with many of my colleagues, that the Spanish

Anxo Sánchez @anxosan

10h

Today I have made a decision I've been thinking about for a while. From 2020 I will follow [Plan S coalition-s.org](#) as an individual researcher, no matter where my funds come from. Potential co-authors, students and postdocs, be aware. Read about it [anxosanchez.eu/adopting-plan-...](#)

1 5 8 ...

Anxo Sánchez

@anxosan

I believe [@evamen](#) will like this. If you also like this, spread the word, and think about it. Perhaps you want to contribute to ending the crazy, unfair and damaging business of scientific publication
